The GREENBTC (GBTC) Token has started to gain global recognition. Pledges have been made from 30 different countries. Here's your opportunity to play a major role in developing a new green world!

Can you explain in detail what is GREENBTC (GBTC) crypto.

GREENBTC (GBTC) is an ERC 20 token located on the Ethereum network.

GREENBTC (GBTC) ERC20 TOKEN CONTRACT

ADDRESS: **0x53452EFEE3137abB2965C2CC6DFC3fc13b2030B3**

GREENBTC (GBTC).

Created to fund 1000's of new and existing ecosystem projects and services on a global scale. <https://etherscan.io/public-profile?uid=5ed01de5>

<https://etherscan.io/token/0x53452EFEE3137abB2965C2CC6DFC3fc13b2030B3#code>

How do you buy GREENBTC?

The process is very simple. First you will need a digital wallet. We recommend using MetaMask.

It's free and compatible with Uniswap DEX (Decentralized exchange).
This is the exchange where transactions are carried out i.e. Buy, Sell, Trade, Swap.

MetaMask is a browser extension and a mobile app that equips you with a key vault, secure login, token wallet, and token exchange—everything you need to manage your digital assets.

Step-by-Step Guide:

1. Download the [MetaMask wallet](#).
2. Create your wallet. For a guide, see this [page](#).
3. Make sure to take a backup of your seed phrase.

Summary:

- > The MetaMask wallet can be used on PC, Tablet, & Mobile phone.
- > Your personal wallet address is used to carry out GREENBTC (GBTC) token transactions.
- > Create your wallet, then buy some Ether (Ethereum) tokens.
- > ETH tokens are required to facilitate the transaction process.
- > Buy ETH in MetaMask, then go to Uniswap (exchange).
- > SELECT the GREENBTC (GBTC) token (or copy and paste the token contract address. 0x53452EFEE3137abB2965C2CC6DFC3fc13b2030B3
- > Type in how many tokens you want to buy, price will show along with amount of ETH.
- > The exchange charges a **GAS fee** for every transaction (ETH is used to pay for gas fees, the price varies throughout the day).
- > Confirm the transaction (swap).
- > Success, transaction pending. Can be viewed on Ethereum blockchain.

Will the price of GREENBTC (GBTC) move much?

We are expecting great things from GREENBTC (GBTC) including its value increasing.

But in the world of crypto currency nothing is guaranteed.

Note: FREE airdrops, Giveaways, Rewards

Your MetaMask wallet address will be required if you participate in any of our **FREE airdrops, Giveaways, Rewards, or GREEN WEALTH SYSTEM**, programs.

What happens if I lose my GREENBTC (GBTC) TOKENS?

From the very beginning you must take precautions to guard against loss. For example, **keep all security passwords, blockchain addresses, secret keys etc, and any other vital information 'offline'**. Somewhere safe. The blockchain is very unforgiving, if you give out wrong addresses / information **you will lose your tokens**.

What is a crypto wallet?

A crypto wallet is a tool that enables investors to securely buy, sell, swap, hold, or trade their tokens. It operates in a decentralized manner, meaning it functions as your own personal bank. We highly recommend using MetaMask as your crypto wallet of choice. It is simple to set up, user-friendly, and completely free of charge.

What is a Decentralized Exchange?

DEX, short for Decentralized Exchange, is a platform that offers a high level of privacy and security for community members and investors to buy and sell their tokens. It provides a decentralized approach to trading, eliminating the need for intermediaries. Notably, the GREENBTC (GBTC) token will be listed on the Uniswap exchange, marking its first listing on a decentralized exchange. More exchange listings are planned.

What is a blockchain?

Blockchain is a shared, immutable ledger that facilitates the process of recording transactions and tracking assets in a business network. A blockchain is "a distributed database that maintains a continuously growing list of ordered records, called blocks." These blocks "are linked using cryptography. Each block contains a cryptographic hash of the previous block, a timestamp, and transaction data.

Buying GREENBTC (GBTC) / Uniswap / MetaMask:

Mobile access 24/7

Anywhere – Anytime! Uniswap / MetaMask interaction very fast.
Easy to use, simple steps.

Low transaction fees

Buy, sell, swap, or cash-in your GREENBTC (GBTC) with very low fees.

Identity Protection

No KYC, No taking of photographs. Privacy and anonymity respected

Money Security

We provide highest level of security. We recommend Uniswap exchange (DEX) and MetaMask digital wallet.

Technology

Using the most up-to-date technology to make sure your transactions are always safe and secure

TIMESTAMP

A timestamp is a sequence of characters or encoded information identifying when a certain event occurred.

Simplified payment verification

This allows a transaction recipient to prove that the sender has control of the source funds of the payment they are offering without downloading the full Blockchain.

Combining and splitting value

Combining and splitting value refers to the process of splitting a group crypto into smaller values. This allows all transactions to be processed in the blockchain, no matter how small the value.

Uniswap.

Is a decentralized exchange (DEX) that allows users to trade cryptocurrencies directly from their wallets. It's built on the Ethereum blockchain network.

How to swap tokens with the Uniswap Web app.

Full details [here](#)

> Open [Uniswap web app](#) and [connect your wallet](#).

> Then select the **token drop-down**.

> Search for and select the token you wish to swap.

You can browse the **token list** or search for a token by name **or contract address**.

0x53452EFEE3137abB2965C2CC6DFC3fc13b2030B3

- > Now you have to **select** the token you want to swap for. Select the token drop-down.
- > **Enter the amount** you would like to swap, receive, or select the “Max” option. The “Max” option automatically inputs the total amount of the token you have available in your wallet for swapping.
- > Select “**Swap**”.
- > Review the swap details, and then select “**Confirm Swap**”.
- > In your MetaMask wallet, **approve** spending for the token you are swapping.
- > This will require a [network cost](#). If this is your first time swapping the token with the Uniswap protocol, then you’ll need to approve the token in order to trade it. For more information on token approvals see our article “[What is a token approval](#)”?
- > In your wallet, **confirm** the swap. [This transaction requires network costs](#).
- > Once confirmed, your swap is submitted to the blockchain and is **pending**.
- > You will see “**Swap success**” and a green checkmark on screen when the transaction is successfully completed.

You have now successfully swapped with Uniswap!

To view your swap on [Etherscan](#), you can select “**View on Explorer**”
